

# VOTE YES ON SB 34

Ensure data centers, and only data centers, pay the billions of dollars of costs they cause.

“ Sen Chuck Hufstetler: “[SB 34] would remove the costs of construction, distribution, and transmission costs from our consumer bills ... and place the costs where it should be. Those that are responsible for these costs should be paying it.”

Our data centers can be good for the state but many of them I talk to agree they should be paying these costs.”

**\$43** Average Monthly Bill Increase

for Georgia Power customers. Does not include BILLIONS in requested upgrades

In use and planned data centers would utilize **DOUBLE** of Plant Vogtle's Output.

**\$0.24** Return on every \$1 in tax credits

2022 state audit showed a negative return on tax breaks

“ Former PSC member, Bobby Baker, said the new rules the PSC approved are full of loopholes that give Georgia Power so much flexibility over compliance that they offer no guaranteed protections for residential ratepayers. “[PSC] rules changes are essentially worthless... The cost causers need to pay for the costs they cause.”
